**DETAILED ACTION**

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8, drawn to a system for accessing pharmacy data and ordering prescriptions, classified in class 705, subclass 26.
- II. Claims 9-16, drawn to a method of enabling one or more customers to order prescriptions and access pharmacy data, classified in class 705, subclass 26.

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the method of Invention II offers an alternate method of a prescription order selection and/or a pharmacy data access selection, which is evidence that the method can be performed by a different apparatus. The method of Invention II, therefore, is capable of being practiced by a different system than that of Invention I which is a system that transmits a prescription order form.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

A telephone call was made to Randall Rueth on 2/26/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
